

Summer intern housing Short-term rentals needed

As Idaho National Laboratory prepares for the arrival of hundreds of summer interns, there is a need for short-term rentals.

Providing comfortable, affordable, and safe housing for university interns and visiting faculty members helps ensure they have an excellent experience during their time in eastern Idaho. As most INL internships are 10- to 16-week appointments, this list is intended for short-term rental opportunities.

[Completion of all fields on the new form is required for your listing to be included in the Housing List – even if you have submitted your property before.](#)

We have also added a new form for removing a property once it has been rented or if you no longer wish to participate.

Your property will be provided in weekly listing notifications that are sent to students.

To add a property: [Click Here](#)

To remove a property: [Click Here](#)
